

Voltage and current measurement of Free Energy Resonator. Close look at the all components

This video of Free Energy Resonator is filmed on your requests. You can see there voltage and current measurement. There are many proofs of genuineness of my Free Energy Generator.
In this video you can very clearly see all its components.

Check out my other interesting videos of Free Energy Devices:

<https://www.youtube.com/channel/UCnGR...>

Please be aware, that these resonators aren't only about exact dimensions, they are mainly about used materials.

Scaling free energy generators. Feeding LED bulb with two free energy resonators.

Dimensions:

Magnet:

Ø: 15 mm

Height: 8 mm

Magnetisation: N52

Cylinder:

Outer Ø: 8,8 mm

Inner Ø: 7,7 mm

Height: 16,3 mm

Antenna:

Antenna Ø: 10,6 mm

Wire Ø: 1 mm

Height: 49 mm

Coils: 23 - 24

Insulator:

Ø: at least 11 mm

Height: max 3 mm

Please be aware, that these resonators aren't only about exact dimensions, they are mainly about used materials.

Free Energy Generator - magnet motor used as Free Energy Light Bulb

This is practical show how I can use one of my Free Energy Generators (magnet motor or free energy motor). This is real Free Energy Device. This video shows how to use this free energy magnet motor - free energy fan with 3V LED bulb.

Free Energy Generator, Resonator used as Free Energy Light Bulb

Dimensions:

Magnet:

Ø: 15 mm

Height: 8 mm

Magnetisation: N52

Cylinder:

Outer Ø: 8,8 mm

Inner Ø: 7,7 mm

Height: 16,3 mm

Antenna:

Antenna Ø: 10,6 mm

Wire Ø: 1 mm

Height: 49 mm

Coils: 23 - 24

Insulator:

Ø: at least 11 mm

Height: max 3 mm

Please be aware, that these free energy devices - resonators aren't only about exact dimensions, they are mainly about used materials.

Free energy generator, really working free energy magnet motor

This is my third Free Energy Generator - free energy magnet motor - free energy device if you like.

First please look at my two previous free energy genertaors.

<https://youtu.be/uyb7toSJ-OY>

<https://youtu.be/TNShdzUNpo0>

Here are no wires, no PC fan, no battery, no motor, only common CD and my special neodym magnets stucked on it.

I heard your suggestions and filmed it on the floor and under the transparent glass with big field of view. At the end you can see disassembly and much bigger field of view.

The big magnet parameters:

Diameter 45 mm

Height 30 mm

Material NdFeB

Surface (Ni-Cu-Ni)

Magnetisation N50

Strength 98kg

Weight 360g

First real Free Energy Generator - Magnet motor - proven functionality - additional video

This is only additional video for main video of Free Energy generator (magnet motor or free energy motor), look at the main video first here <https://www.youtube.com/watch?v=uyb7t...>

This video is filmed in the air, no table, bigger field of view.

The big magnet parameters:

Diameter 45 mm

Height 30 mm

Material NdFeB

Surface (Ni-Cu-Ni)

Magnetisation N50

Strength 98kg

Weight 360g

The best Free Energy Generator - magnet motor - additional video filmed in the air

Look at the original video first <https://youtu.be/TNShdzUNpo0>

This is only additional video for main video of Free Energy generator (magnet motor or free energy motor) to prove there was nothing under the table.

This video is filmed on your requests and is filmed in the air, no table, bigger field of view, both hands.

The big magnet parameters:

Diameter 45 mm

Height 30 mm

Material NdFeB

Surface (Ni-Cu-Ni)

Magnetisation N50

Strength 98kg

Weight 360g

The best Free Energy Generator - magnet motor - totally proven functionality, no doubts.

Before any question or comment watch additional video here!!! <https://youtu.be/GjrUPbZ-4E4>

It was filmed on your requests and filmed in the air, no table, bigger field of view, both hands.

Description:

The best Free Energy Generator (magnet motor or free energy motor), without any electronics, no motor, no wires, only plastic chassis and low profile special neodyms.

As usual, my Free Energy Magnet Motor has variable speed. The closer the magnet is the faster is this Free Energy Device spinning.

The big magnet parameters:

Diameter 45 mm

Height 30 mm

Material NdFeB

Surface (Ni-Cu-Ni)

Magnetisation N50

Strength 98kg

Weight 360g

Little magnet parameters:

Actually I use two different diameters of those little magnets, probably you didn't notice that. It depends on the Free Energy Fan (generator) diameter. This bigger blue fan uses magnets with diameter 12 mm.

You can look at my previous Free Energy Generator here <https://www.youtube.com/watch?v=uyb7t...>

or at even better Free Energy Generator (magnet motor) here: <https://youtu.be/NQ998LjYre4>

First real Free Energy Generator - Magnet motor - proven functionality

Before any comment, look at this additional video of this free energy device first <https://youtu.be/xMR4AU5WhIY>

This video of Free Energy Magnet Motor (free energy motor) is not like the others. There are three big proofs here. This Magnet Motor is REAL.

1. this free energy generator - magnet motor reacts on the strength of the magnetic field. The closer the magnet is, the faster it is spinning. The further the magnet is, the slower it is spinning. This generator doesn't have constant speed!

2. when i put the big neodym magnet in the middle of the magnet motor, the one is not spinning and the LED is neither shining nor blinking, because magnetic field affects all those magnets by the same strength which cannot cause any spin!

3. the LED is not shining constantly in very low speed. Simply, it is not possible due to way how is the energy produced by the motor. The slower it spins the slower the LED blinks. Every single blink is how rotor magnet goes over the stator coils. Simply said, the LED cannot be shining constantly during whole range of speed.

If there had been some reed relay + battery, the generator would have had:

1. constant speed, no matter how close the magnet is
2. would have been spinning, at least LED would have been shining when i put the magnet in the middle of the generator.

You can look at my better Free Energy Generator I have made here: <https://youtu.be/TNShdzUNpo0>

or at even better Free Energy Generator here:

<https://youtu.be/NQ998LjYre4>

The big magnet parameters:

Diameter 45 mm

Height 30 mm

Material NdFeB

Surface (Ni-Cu-Ni)

Magnetisation N50

Strength 98kg

Weight 360g

Here you can look at additional video of this Free Energy pc Fan filmed in the air. <https://www.youtube.com/watch?v=xMR4A...>

_

The best Free Energy Generator. The best Free Energy Resonator feeding simple LED.

This is video of Free Energy Generator - Free Energy Resonator tested with simple LED diode. There are many proofs of genuineness of this Free Energy Device in this video.

Simply said, this is probably the best of ExperimentsLab.

Developing of my Free Energy Generators took a lot of time and money and I cannot guarantee you the same result.

I am definitely not responsible for your unsuccess. Don't blame me for your potential failure. It is not my responsibility.

My videos (generators) aren't primarily intended to be replicated.

Scaling Free Energy Generators. Three Free Energy Resonators, amazing power

This video shows possibilities of scaling Free Energy Generators (Free Energy Resonators).

I'm still thinking about how to improve my Free Energy Resonator, how to get more electricity from it. I figured out this very simple solution.

Square neodym magnet and Free Energy Resonators around it.

Amazing power from this Free Energy Device.

In this video is also fluorescent lamp to prove I don't have any tesla coil near this Free Energy Device.

Antenna: Medium carbon steel coated with Vanadium or Tungsten

Cylinder: Aluminium coated with Nickel

Insulator: Similar to Scotch Electrical Semi-Conducting Tape 13

Neodym magnet N45

Developing of my Free Energy Generators took a lot of time and money and I cannot guarantee you the same result.

I am definitely not responsible for your unsuccess if you decide to replicate it.

Don't blame me for your potential failure. It is not my responsibility.

My videos (generators) aren't primarily intended to be replicated.

Free energy resonator cooled by Liquid Nitrogen. Liquid Nitrogen Free Energy Generator experiment

This Free Energy Resonator (Free Energy Generator) is one of my first ones that I tried to coat with vanadium and the process failed.

Then I decided to do some other experiments with this Free Energy Generator.

In this short video I'm gonna show you what happens when I dip the Free Energy Resonator into Liquid Nitrogen.

Not too practical, it is only for experimental reason. Someone could find it interesting.

If you wanna see more my Free Energy Generators, check out my other videos here: <https://www.youtube.com/playlist?list...>

Unlimited phone battery power with Free Energy Generator. Free Energy resonator as phone charger

This is one of my Free Energy Resonators (Free Energy Generators), if you wanna know more info and see more better videos about it, look at my YT channel.

<https://www.youtube.com/playlist?list...>

This video is to show you my Free Energy Generators are useful in many aspects, for example for phone battery charging everywhere you are. With this Free Energy Resonator you will never run out of battery.

I tuned up this Free Energy device by coating the antenna with Vanadium to get slightly over 5V, but it doesn't mean any upgrade or upscale. It has about 5V but less mAmps than my other Free Energy resonators which has almost the same power as my other 3V resonators.

In this video is also fluorescent lamp to prove I don't have any tesla coil near this Free Energy Device.

My videos (generators) aren't primarily intended to be replicated.

Upscaled Free Energy Resonator with supporting antenna. Awesome power of this free energy generator.

This is my upgraded (upscaled) version of Free Energy Resonator (Free Energy Generator). It is Free Energy Device that receives radiation from electrosmog that is everywhere around us.

This Free Energy Generator (resonator) is used to feed 3V LED bulb.

In this video is also fluorescent lamp to prove I don't have any tesla coil near this Free Energy Device.

I have to say I don't understand every single principle I only took advantage of all TechTorr's clues and experimented with all possible materials. That's why I am not able to explain all principles. It is also merit of my good friend that do all that magic with chemicals.

Here you can find my first Energy Resonator and more info about it <https://youtu.be/6ibuEnr0cYc>

Dimensions:

Magnets:

6pcs

Ø: 20mm

Height: 1mm

Magnetisation: N45

At this moment I am experimenting with many other magnets.

Cylinder:

Outer Ø: 8,7 mm

Inner Ø: 7,6 mm

Height: 12 mm

Widening on the top Ø: 13 mm

Big Wolfram coated antenna:

Material: medium carbon spring steel

Antenna Ø: 10,7 mm

Wire Ø: 1 mm

Height: 50 mm

Coils: 23

Coated by Tungsten

Smaller support black antenna:

Material: medium carbon spring steel

Antenna Ø: 6 mm

Wire Ø: 0,6 mm

Height: 38 mm

Coils: 13

Coated by Vanadium V2O3

Insulator:

Ø: 16mm

Height: 0,8mm

This black insulator is semi-conductive tape (semiconductive layer) that is using in High Voltage Cable industry.

At this time we are experimenting with many other materials and configurations.
